## **Archetypes in Constellation Work**

In constellations, archetypes can provide an opportunity for us to shift into our right hemisphere, where the linear logic of the left brain dissolves to reveal an inseparable wholeness of our existence. Here our vision of the „all is one“ becomes reality.

Moreover, the hidden orders of human existence emerge and reveal an almost impenetrable form. Archetypes form a new frontier where appropriate systemic solutions can demonstrate their generalized power as well as their transcultural impact.

The experiential reproduction of the archetypal images connects us to our deepest roots that emerge as living and active, therefore changeable, elements within us.

In this workshop, Stephanie and Sanaz will introduce you to the various archetypes, their shadows, and the impact they have on our lives.

We offer 40 places in this workshop and recommend your early booking.
